PRETORIO II 0032

4D

Both metal and solid wood feet of the similar design are available.

The showy version of PRETORIO II (0032) is characterized by the legendary “Chesterfield” element. Being fussed with the very modernly ultra-thin cushion (seat) appearance, PRETORIO II (0032) is certainly a modern interpretation of a classic.

PRETORIO I 0031

The clean version of PRETORIO I (0031) presents the “square and smooth” elements, a beautiful presentation of European modern sofas.

Both metal and solid wood feet of the similar design are available.

Matching coffee table with tempered glass top and genuine leather body.

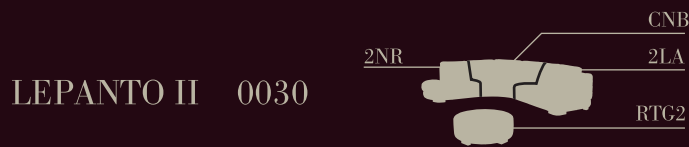

LEPANTO II 0030

Matching coffee table with tampered glass top and genuine leather body.

Both solid wood and metal feet (please see the metal feet of TUSCOLANA I, 0041, for detail) are available.

The showy version of LEPANTO II (0030) is characterized by fashionable geometric patterns on arms. These are the results from highly skillful handwork with uncompromised quality.

LEPANTO I 0029

**KELVIN GIORMANI**   
*Luxury Sofas*

The clean version of LEPANTO I (0029) is not simple at all. The vivid outline of the arm top by special sewing technique tells the story.

The generally smooth and round shape of both LEPANTO I (0029) and LEPANTO II (0030) present the latest trend of “clean and round” in European modern sofa design.

Stories of Genuine Leather

**Full Grain and Aniline Leather** preserves the natural hand touch and characteristics of natural cow hides. Using this category of leather in sofas gets you closer to nature everyday.

Thanks to Italian advanced leather tanning technology, water and stain resistant characteristics can be added onto **High Performance Pigmented Leather** without damaging the natural characteristics and softness. Having this category of leather in sofas, users can easily use neutral detergents to clean up many different kinds of stains on sofas.

Leather is a natural material. To give sofa users the natural touch of leather, KELVIN GIORMANI always reminds our Italian tanneries to minimize any unnecessary surface correction and chemical processes onto a piece of cow hide. As a result, we preserve also the natural characteristics which can only be found on genuine leather, such as, healed scars, natural veins and neck marks, natural variance on colors and grains. We love to feel the naturalness of genuine leather sofas, and we also appreciate everything that comes together with natural leather.

Quality Assurance by Two Name Brand Italian Tanneries

Why do quality oriented sofa makers always work with Italian name brand tanneries? After genuine cow hides have been processed, even professionals sometimes can't accurately classify the quality standard with bare hands. Also, not all Italian tanneries are certified by international quality assessment institutions. In order to ensure the quality of leather used, KELVIN GIORMANI always **remain quality supply from Mastrotto Italia (of Gruppo Mastrotto spa) and Peretti Gruppo .**

## Our Workmanship on Leather

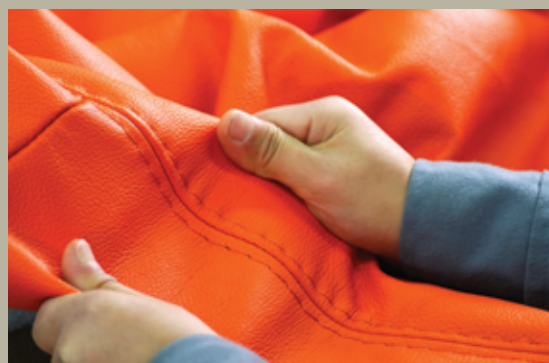

Always keeping millions of sq. ft. of leather in stock enhances on time delivery of finished sofas.

KELVIN GIORMANI proudly continues the tradition of “outlining” and “cutting” the leather as two separate procedures to better allocating natural characteristics to proper portions of a sofa.

Cutting leather with care ensures the best results on sewing leather covers.

Quality sewing beautifully outlines the design and ensures the durability of every sofa.

High performance sewing machines are keys to achieve every pretty and durable stitching line.

## Concepts of Our Fabric Sofas

KELVIN GIORMANI offers a wide variety of fabric choices and always keeps materials in stock.

Our customized service makes every fabric sofa possess an unique profile of patterns at customers' choices.

Capability of mass production of fabric sofas offers economy of scale as well as quality.

All KELVIN GIORMANI fabric sofas are made with slipcovers. Easy change of styles by easy putting up different fabric slipcovers gives fashion elements on fabric sofas.

Our Frames · Upholstering · Packing

## Sofa Frames of German Engineering Standard

KELVIN GIORMANI only uses selective hardwood materials to build a frame. Softwood like pine was never a choice.

Having long years of producing sofas with the label of a name brand German sofa maker, KELVIN GIORMANI also build frames of our in-house name with the same standard.

All wooden materials are kiln-dried to ensure low moisture level and prevent the frames from twisting.

KELVIN GIORMANI always treats inside elements of a sofa no less important than the outside. The quality of a person is originated from the inside, and so are KELVIN GIORMANI sofas.

Strong glues on all wood joints and using of corner blocks are important elements.

## High Quality inside Stuffing Materials

The density and quality of the foams used are supplied and assured by large scale, specialized factories. The products are tested as if they are used for a considerable amount of time.

KELVIN GIORMANI sofa cushions and edges foams are always wrapped by extra sheets of high density polyester fibers. Additional work and time devoted for this procedure gives KELVIN GIORMANI sofas a more luxury appearance and comfortable seating.

Combination of feather and foam provides the perfect balance of comfort and support on seat and back cushions.

Properly gluing leather covers on foams is a little thing that greatly enhances the durability of KELVIN GIORMANI sofas.

## Skillful Workmanship of Upholstering

Mounting is one of the most skill-oriented sections of sofa production. As almost the final work station, it gives the final shapes of every beautiful KELVIN GIORMANI sofa.

Not just the top, our technicians also care about the mounting jobs at the bottom of KELVIN GIORMANI sofas.

A KELVIN GIORMANI sofa “stands” by its feet that are built with strength. A KELVIN GIORMANI label means that we stand by our products.

Without a careful and skillful mounting job, a well-sewed stitching line will never be able to express its beauty on a sofa frame.

## Strong Emphasis on Packing

Carefully packing KELVIN GIORMANI sofas makes them arrive in a good shape at end consumers’ hands.

Soft and tough packing materials protect the sofas not only from the outside. They also better retain the original shape of the sofas.

For sofas with highly irregular arm shapes, molded foam is always a helpful tool to even out pressure when the sofas stand up on the arms during transportation.

Box or soft exterior packing materials are both available.

*Leggett & Platt.*

**LEGGETT & PLATT** is the world’s largest manufacturers of sofa mechanisms and a FORTUNE 500 American company. KELVIN GIORMANI uses its “zero-wall” recliner mechanisms for years.

**LUSCH** is a highly regarded German manufacturer of sofa mechanisms. KELVIN GIORMANI always develops stylish European-design sofa functions and special features with LUSCH mechanisms.

**HETTICH** has been for years as a well-known German company which supplies an large variety of furniture hardwares and mechanisms. KELVIN GIORMANI is pleased to include some of them in our sofas that give functionality and durability.

Some says KELVIN GIORMANI sofa is a melting pot of elements from different parts of the world. We are proud to make good use of highly skilled handwork from the country of our origin, being incorporated with European modern designs and German production techniques as well as the materials and mechanisms from American and European companies.

Engineering of Sofa Feet

Understanding the importance of both the structure and easy-to-assemble, KELVIN GIORMANI makes the sofa feet, if necessary to be detached when packing, ready to be assembled and disassembled with a simple tool and bare hands without big effort.

Short sofa feet are always already assembled to save customers’ effort at the marketplace. Small plastic knobs under all types of sofa feet are to avoid any corner or edge of sofa feet from damaging users’ flooring materials.

Smart Connectors

Special plastic buckles to fix the loose back sofa cushions.

Specialized metal hardware for connecting sofa modules with loose seat cushions.

Metal hardware to connect different modules of a sofa composition.

Special metal buckles to fix the loose seat cushions.

Having zippers to connect back cushion top onto sofa frame top, KELVIN GIORMANI sofas back cushions can easily be maintained at the proper shape and position.

Our Quality Assurance

Strict Quality Control System

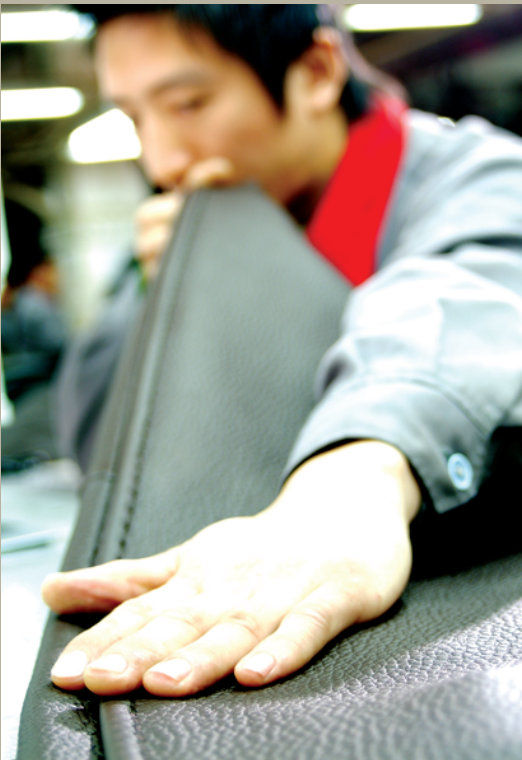

Every single piece of leather is checked and graded manually before putting onto the production line.

Controlling for the correct measurement and quality of wooden parts is important to guarantee the long-lasting structure of each KELVIN GIORMANI sofa frame.

Without the proper technical requirement of the sinuous springs, KELVIN GIORMANI sofas will never achieve the right seating comfort and durability.

A usual gesture of KELVIN GIORMANI sewing technicians to check the smoothness of every stitching line.

“Size does matter.” This is one of the concepts of each quality control staff of KELVIN GIORMANI’s.

Besides our in-house label, KELVIN GIORMANI, we also develop different quality control standards with different brands of sofas produced in our factory according to their requirements.

Seeing this label, KELVIN GIORMANI label, in a sofa, you see quality inside and outside of the sofa, you see quality assurance backed by the effort from people who care.
