

Modern Sofas with Showy Details

Kelvin's Design at World Class Art Basel HK

Kelvin was invited to show ENEGO chair
(together with chairs from the other 8 well known Hong Kong designers)
in the "HK Designer Chairs Salon"
at the world's most prestige art fair, Art Basel, in May 2013, Hong Kong.

LIBERTA II S0332

LIBERTA II S0332

One of the design highlights of Model LIBERTA is the flat stainless steel frame that runs all the way around the sofa base. There are two options of sofa legs. The code "S" in the front of the model number means that the stainless steel sofa leg is engraved with the multi-straight-line pattern, which becomes a unique feature for a minimalistic model like LIBERTA. If a cleaner sofa leg design is preferred, just simply take the second option and add "M" in the front of the model number, which eliminates the multi-straight-line pattern.

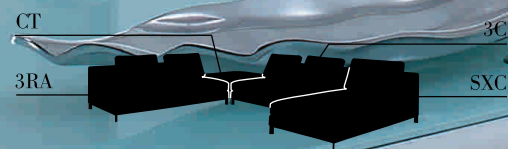

Optional stool (ST2) is available with the matching stainless steel base frame and sofa legs.

Model LIBERTA is generally a minimalistic and timeless model that can well match with any modern contemporary living room interior setting. For each individual item of Model LIBERTA, it was specially designed with each lateral or front side of the sofa being straight and flat (and fully finished with leather) that difficult items can be put together to become different composition sofa sets. This feature allows users to alter the configuration of a sofa set to be different from its original composition.

Model ROSSE (AC66) features fully upholstered leather legs and a pair of light and thin arms which can only be realized by meticulous leather craftsmanship.

Leather: 0570F/0670F (subject to availability)

LIBERTA II S0332A

LIBERTA II S0332A

One of the design highlights of Model LIBERTA is the flat stainless steel frame that runs all the way around the sofa base. There are two options of sofa legs. The code "S" in the front of the model number means that the stainless steel sofa leg is engraved with the multi-straight-line pattern, which becomes a unique feature for a minimalist model like LIBERTA. If a cleaner sofa leg design is preferred, just simply take the second option and add "M" in the front of the model number, which eliminates the multi-straight-line pattern.

Optional leather upholstered coffee table with white tampered glass top (STG3W) is available with the matching stainless steel base frame and sofa legs.

To add some unconventional features to a minimalistic and timeless design piece like Model LIBERTA, you can choose to place the special crocodile skin print leather onto the inner and upper side of the sofa arm and back. Simply just mark an "A" at the end of the model number for indicating where the crocodile skin print leather to be placed.

If a large corner composition of sofa is placed at the center of a living room but a more open configuration is preferred, placing a "CT" item at the corner will be a perfect choice. It can also be placed in the front of a sofa set to become a squared stool.

Optional headrest (HR4) is available for extra support on the head and neck.

With a clean and minimalistic design, Model LIBERTA is perfect for matching with unconventional leather articles that have eye-catching effects.

As seen on the photo, Model LIBERTA is upholstered with a special leather named GEKO Premium. It is a natural grain, semi-aniline, kind of leather, which has a wax application on top that gives it a very smooth appearance and hand touch.

When GEKO leather is applied with an additional embossing process, it becomes a new article name GEKO Pattern which has 3 choices of embossed patterns. GEKO Mikonos is an imitation of elephant skin; GEKO Santolini is an imitation of bison skin; GEKO Totem presents abstract straight lines pattern. It is recommended to combine both GEKO Premium and one of the GEKO Pattern leathers on sofas like Model LIBERTA.

As seen on the photo, Model LIBERTA is made with the combination of GEKO Totem (on the outer frames) and GEKO premium (on frames interior and cushions).

Leather: 3278F (subject to availability)

Model LIBERTA is generally a minimalistic and timeless model that can well match with any modern contemporary living room interior setting. For each individual item of Model LIBERTA, it was specially designed with each lateral or front side of the sofa being straight and flat (and fully finished with leather) that difficult items can be put together to become different composition sofa sets. This feature allows users to alter the configuration of a sofa set to be different from its original composition.

One of the design highlights of Model LIBERTA is the flat stainless steel frame that runs all the way around the sofa base.

There are two options of sofa legs. The code "S" in the front of the model number means that the stainless steel sofa leg is engraved with the multi-straight-line pattern, which becomes a unique feature for a minimalistic model like LIBERTA. If a cleaner sofa leg design is preferred, just simply take the second option and add "M" in the front of the model number, which eliminates the multi-straight-line pattern.

When one of the back cushions of item "4LA" is placed at the different position, a new seating position can be created. It makes Model LIBERTA a very flexible and practical seating device.

With a clean and minimalistic design, Model LIBERTA is perfect for matching with unconventional leather articles that have an eye-catching effect. The purple leather, NEVICATA, is an aniline leather which the top is specially bufted to create a kind of "stone washed" effect that intensifies the 2-tone color contrast.

LIBERTA IV S0333

One of the design highlights of Model LIBERTA is the flat stainless steel frame that runs all the way around the sofa base.

Optional leather upholstered coffee table with black tempered glass top (STG3B) is available with the matching stainless steel base frame and sofa legs.

Model LIBERTA III (no. M0333) has an additional design feature. The leather at inner and upper side of the sofa arm and back is perforated with small diamond patterns. This is a special leather crafting effect that is very rarely featured on sofas, which makes this "timeless" design piece, Model LIBERTA, not always "the same"... There is indeed something "new" about it.

Model LIBERTA is generally a minimalistic and timeless model that can well match with any modern contemporary living room interior setting. For each individual item of Model LIBERTA, it was specially designed with each lateral or front side of the sofa being straight and flat (and fully finished with leather) that difficult items can be put together to become different composition sofa sets. This feature allows users to alter the configuration of a sofa set to be different from its original composition.

BRILLANTE II 0335

BRILLANTE II 0335

Optional headrest (HR4) is available for extra support on the head and neck.

Each arm exterior of Model BRILLANTE II is decorated by a special stainless steel frame where a perforated leather piece is mounted.

BRILLANTE II 0335

Model BRILLANTE II was designed to magnify the beauty of leather perforation effect on sofa products, which hopefully creates more attention to this particular leather crafting technique and how it brings out the aesthetics of sofa designs. The perforation pattern on Model BRILLANTE II is similar to that of Model LIBERTA but the size of the diamond-shape is larger.

Leather: 9418F (subject to availability)

BRILLANTE I 0334

Model BRILLANTE I is the minimalistic version in which the perforation effect is not included. The generally clean cut outline becomes the main tone of design. The 17cm high sofa leg feature enhances the modern contemporary flair of Model BRILLANTE .

Without the perforation effect, the arm exterior of Model BRILLANTE I exudes the aesthetics of geometric patterns. It certainly brings a unique character to a minimalistic model like BRILLANTE I.

Optional stool (ST2) is available with the matching base frame and stainless steel sofa legs.

NETTO I 0330

Leather: 9423F (subject to availability)

In Model NETTO I, the exterior arm frames and the seat front frames are tightly upholstered which well defines the profile of the sofa.

Optional leather upholstered coffee table with white tempered glass top (STG3W) is available with the matching base frame and sofa legs.

Optional headrest (HR4) is available for extra support on the head and neck.

Leather: 2293F (subject to availability)

NETTO II 0331

In Model NETTO II, the exterior arm frames and the seat front frames are tightly upholstered by perforated leather. Although the entire sofa is made with the same color of leather, the perforation effect creates a darker tone comparing with the smooth (non-perforated) leather on the soft cushion portions of the sofa. The 2-tone contrast on the same color enhances the profundity of the appearance of Model NETTO II.

Optional stool (ST2) is available with the matching base frame where the special leather perforation effect is placed.

NETTO II 0331

Mounting perforated (and soft) top grain leather on hardwood sofa exterior frames is a kind of meticulous leather crafting technique which can only be achieved by highly skilled hands.

The design inspiration of Model FARFALLA was coming from the beauty of butterflies. The leather folding effect on the back frame front expresses the aesthetics of leather crafting details. It also resembles the "grain patterns" found on some butterfly species.

Leather: 7543F (subject to availability)

FARFALLA 0339

Armchair Model ASTI (no. AC65) has a particular round open design at the back that perfectly matches the unique shapes and forms of Model FARFALLA.

Optional stool (ST2) is available with the matching design of the seat frame and sofa legs.

The design of Model FARFALLA's back was so carefully conceived which stimulates people's imagination that the FARFALLA is "flying".

There are options of solid stainless steel legs (Model no. M0339) or wooden legs (Model no. H0339).

The designs of both legs are inspired by the shapes of some butterflies' lower wings.
