## DESIGN

### CONSTRUCTIVE DESIGN

All the materials used correspond to the requirements according to RAL-GZ 430/4.

Fully upholstered suite, metal base frame

Seat upholstery structure: zig-zag springs, polystyrene foam VW 40, 70% foam sticks VW 40, 30% Comforel fiber, Diolen

Back upholstery structure: rubber straps, Dacron, polystyrene foam, 70% foam sticks, 30% Comforel fiber, Diolen

### UPHOLSTERY VERY CASUAL

With casual upholsteries you are rather sitting „in the sofa“ than on it, the upholstery snuggles. A very casual upholstery is characterized by a smooth, soft surface. The covers are intended showing a distinctive curly image and an extended wrinkling on seat, back and armrests already in new condition. With this high quality upholstery with bay quilting as applied a flexible mixture out of loose filling material as foam sticks and/or plumes enables a point adaptation to the body. For this the fillings are worked in separate bays which come more or less apparent depending on the cover. Sitzmarks are due to model and design typical.

Slight differences in seat firmness with add-on groups are according to construction and therefore constitute no grounds for complaint.

### BACK TENSIONING SECTIONS

All back tensioning sections are supplied as standard with the original cover.

## FUNCTIONS

### I HEAD PIECE ADJUSTMENT

The head piece is infinitely adjustable by a bearing.

#### Armchair A:

With the armchair the head piece can be adjusted by a ratchet mechanism that allows different positions.

## INDICATIONS OF DIMENSIONS AND REQUIREMENTS

All the values given are approximate values: dimensions in centimetres, material requirements in metres, leather requirements in square metres.

For visual reasons with the armchair A the armrest is respectively 3 cm smaller than for the other elements.

## LEGS

## CONTRAST STITCHING

The production is carried out either **with contrast stitching** or with a **thread (tone on tone)** matching the leather in terms of colour.

### CONTRAST STITCHING

With leather covers and with fabric-leather-combinations a **contrast thread colour** must be explicitly chosen.

With bicoloured covers the thread colour will be worked on the front and on the rear side.

Unfortunately with fabric and microfiber covers without leather part a processing with contrast stitching is not possible (**Exception 13-BISON**).

### THREAD TONE ON TONE

The model is worked with a thread matching the cover in terms of colour (tone on tone).

With bicoloured covers and with fabric-leather-combinations the matching thread will be automatically worked on the front and on the rear side.

## SEAM

Depending on the model, the seam on leather covers may be different from fabric covers, especially on fitted items. Decorative leather seam (as double lapped felling or double seams) may be omitted depending on the model according to suitability of the fabric covering material.

This model is only worked with selvedge seam.

## COMBINATION OF COVERING MATERIALS

If desired two different covering materials can be combined with this model.

Here must be indicated the respectively desired covering material with cover part 1 and cover part 2.

With combination of two covering materials of a different price the higher price category will be invoiced as standard.

Fabric - and leather requirements of each cover part on request.

 cover part 1: seat, back and armrests

 cover part 2: tensioning section with seat, back and armrests
