Edition 26.01.2022

Errors and amendments excepted. Our General Terms and Conditions are effective. / WEEE-Reg.-No. DE 69718127

DESIGN

CONSTRUCTIVE DESIGN

All the materials used correspond to the requirements according to RAL-GZ 430/4.

Cantilever armchair, metal frame

Seat upholstery structure: rubber straps, polystyrene foam VW 35, Diolen

Back upholstery structure: rubber straps, polystyrene foam, Diolen

UPHOLSTERY CASUAL / LOOSE

With casual upholsteries you are rather sitting „in the sofa“ than on it, the upholstery snuggles. A casual/loose upholstery is characterized by a smooth upholstery structure. The cover is not waveless. The ridge of the covers on the seat, back and armrests as well as sitzmarks due to the model and design are typical.

BACK TENSIONING SECTIONS

All back tensioning sections are supplied as standard with the original cover.

FUNCTIONS

Cantilever with extra long spring deflection by an innovative designed metal tube frame that is connected with the comfortable seat at only one point.

FUNCTIONAL HEAD PIECE

The head piece is adjustable by a ratchet mechanism that allows different positions.

LEGS

- metal frame shiny chrome or
- metal frame in stainless steel (honed) against extra charge see price list

SEAM

Depending on the model, the seam on leather covers may be different from fabric covers, especially on fitted items. Decorative leather seam (as double lapped felling or double seams) may be omitted depending on the model according to suitability of the fabric covering material.

COVERING MATERIALS

You may find the information concerning the specific properties of the covering materials on the sample labels.

CONTRAST STITCHING

The seam construction diagram and the thread size are defined due to the model.

With leather covers the production is carried out either **with contrast stitching** or with a **thread (tone on tone)** matching the leather in terms of colour. Therefore in such cases the finish must be chosen.

By processing with contrast stitching **the best matching colour of the contrast stitching** was chosen for each leather colour. It will be worked automatically while a certain colour of contrast stitching is not explicitly indicated on the order. More for it in the general sales information.

The below displayed combinations of seam colour and leather colour are recommended, exemplary assignments of the 6 available colours of contrast stitching.

LIGHT GREY 0321

BEIGE 1222

NOUGAT 0281

GREY 0415

DARK BROWN 1002

BLACK 4000

Unfortunately with fabric- and microfiber covers contrast stitching is not possible.

Exception fabric 13-BISON:

With this fabric it can be chosen between a production with contrast stitching or with a thread matching the fabric in terms of colour (tone-on-tone).

Please note: This cantilever can be weighted up to maximum 125 kg body weight. A permanent functioning of this upholstery can only be warranted by correct use. Avoid exceeding effort (e.g. by sitting down), don't weight onesided.
