Edition 15.08.2019

Errors and amendments excepted. Our General Terms and Conditions are effective. / WEEE-Reg.-No. DE 69718127

DESIGN

CONSTRUCTIVE DESIGN

All the materials used correspond to the requirements according to RAL-GZ 430/4.

Fully upholstered suite, wooden base frame with metal back

Seat upholstery structure: zig-zag springs, Dacron, cold foam VW 40, Diolen

Back upholstery structure: rubber straps polystyrene foam, Diolen

UPHOLSTERY CASUAL / LOOSE

With casual upholsteries you are rather sitting „in the sofa“ than on it, the upholstery snuggles. A casual/loose upholstery is characterized by a smooth upholstery structure. The cover is not wavelless. The ridge of the covers on the seat, back and the armrests as well as sitzmarks due to model and design are typical.

Slight differences in seat firmness with add-on groups are according to construction and therefore constitute no grounds for complaint.

BACK TENSIONING SECTIONS

All back tensioning sections are supplied as standard with the original cover.

FUNCTIONS

I FUNCTIONAL ARMREST

The armrests are adjustable by a ratchet mechanism that allows different positions. By pulling beyond the highest position the armrest can be returned to the basic position (armrest lies on the corpus again).

Please note: Armrests with ratchet mechanisms must not be used as seat in the folded up state. The joints are not designed for use with the entire weight of the body.

II FUNCTIONAL BACK

With each element the back can be raised. Thereby the seat depth is enlarged and the sofa becomes a high back.

In addition by actuation a fitted button in the front below the back the complete back can be folded backwards by a gas pressure spring that allows different positions.

Please note: With the **corner GL/R** the back can only be raised. As no gas pressure spring is worked in it's not possible to fold the back backwards.

III SEAT- AND ARMREST ADJUSTMENT

Swiveling seats incl. armrest with elements with code 1

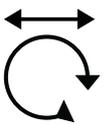

With all seats with code 1 the seat incl. the armrest is swiveling. The complete seat incl. the armrest can be converted into a lying area via manual turning up to 90° forward. Thereby the seat as well as the total depth is enlarged.

Turn- and move function with elements with code X

The seats can be moved to the left as well as to the right.

In addition a turning function is integrated in each seat.

Exception corner G, GH, GS and GSH as well as stool H and HB: These elements have no function.

Turn stopper with elements with code X

A turn stopper can optionally be fitted into the seats with turn function.

It will be charged per article against extra charge (see price sheet). With 2-seat turning elements for both seats.

Please note: With the articles QEXL/R, QXL/R, EXE1, E1EX, QXE1, E1QX, EXPL/R and QXPL/R only one seat is turnable.

By actuation of the sidewise fitted button the rotation of the seat is stopped and is locked in the desired position.

The elements can be moved furthermore also with fixed seat.

Please note: The seat height is enlarged approx. 1 cm due to the turn stopper.

FUNCTIONAL STOOL HF

The fitted cushion with stool HF can be converted into a back by a multiple-stage ratchet mechanism.

Please also note our general details and sales information

Edition 15.08.2019

Errors and amendments excepted. Our General Terms and Conditions are effective.

SURFACE WITH PLATEAUS

The plateaus can optionally be delivered in wood veneer, stone optics graphite or MDF.

WOOD VENEER

In contrast to solid wood veneered surfaces are less sensitive to variabilities of temperature and dampness. Veneered surfaces are protected. This makes the care especially easy and exerts the beauty of the material.

The **plateaus** are optionally available in:

- **wild oak veneered**
(UV laminated with oil effect)

Visual characteristics of wild oak are increased arising branches, small cracks, whirls or face sides. The agility of the wood is also formed by the natural play of colours.

- **wild walnut veneered**
(UV laminated with oil effect)

With wild walnut the wide colour spectrum is varying from grey-brown to red-brown painting to the point of nearly black inlets. Also a share of light sap wood is possible. Limb and growth marks as well as different intense wood structures are characterizing the nativeness of the walnut.

- **PLATEAU IN STONE OPTICS GRAPHITE**
(against extra charge see price sheet)

MDF

(against extra charge see price sheet)

MDF is a wood composite. It is made out of micro-milled wood by gentle pressing operation. The outcome of this is a fine nearly uniform design.

The **plateaus** are optionally available in:

- white RAL9016 (lacquered)

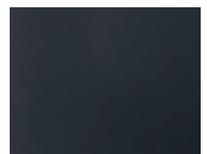

- fango (lacquered)

- taupe (lacquered)

- anthracite RAL7016 (lacquered)

If desired more RAL colours against extra charge available.

We are pleased to make an individual offer.

Information for daybeds and combination elements:

With the daybeds EPL/R and QPL/R as well as with the combination elements E1PL/R, EXPL/R and QXPL/R the leg part of the daybed is protruding the plateau.

With the **add-on daybeds** PL/R and PXL/R the plateau and the seats are flush.

Please also note our general details and sales information

Edition 15.08.2019

Errors and amendments excepted. Our General Terms and Conditions are effective.

LEGS

Metal square-cut runner no. 1 optionally available in:

- nickel satined (stainless steel optics)
- powder-coated structural black mat

from the left to the right:

Aluminium casting sword runner no. 2 optionally available in:

- polished
- bronzed
- black mat

from the left to the right:

TABLE

The **side table KA** (wood veneer / UV laminated with oil effect) is optionally available in:

- wild oak
- wild walnut

COMBINATION OF COVERING MATERIALS

If desired with this model two different covers can be combined.

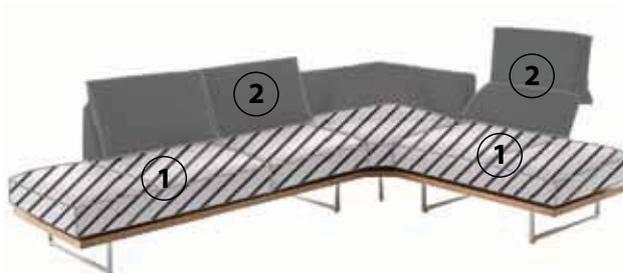

Here must be indicated the respectively desired covering material with cover part 1 and cover part 2.

With combination of two covering materials of a different price the higher price category will be invoiced as standard.

Fabric- and leather requirement of each cover part on request.

 cover part 1: seat

 cover part 2: back

CUSHION RECOMMENDATION

With the **asymmetric corner GL/R** we recommend to use in addition the back cushion Y (84 x 48 cm) for an optimal and improved seat comfort.

With the **pointed corner G and trapez corner GS** we recommend to use in addition the back cushion YG (60 x 49 cm) for an optimal and improved seat comfort.

Edition 15.08.2019

Errors and amendments excepted. Our General Terms and Conditions are effective. / WEEE-Reg.-No. DE 69718127

CONTRAST STITCHING

The production is carried out either **with contrast stitching** or with a **thread (tone on tone)** matching the leather in terms of colour.

CONTRAST STITCHING

With leather covers and with fabric-leather-combinations a **contrast thread colour** must be explicitly chosen.

With bicoloured covers the thread colour will be worked on the front and on the rear side.

Unfortunately with fabric and microfiber covers without leather part a processing with contrast stitching is not possible (**Except on 13-BISON**).

THREAD TONE ON TONE

The model is worked with a thread matching the cover in terms of colour (tone on tone).

With bicoloured covers and with fabric-leather-combinations the matching thread will be automatically worked on the front and on the rear side.

LIGHT GREY 0321

BEIGE 1222

NOUGAT 0281

GREY 0415

DARK BROWN 1002

BLACK 4000

RED 0504

DARK BLUE 0827

SEAM

Depending on the model, the seam on leather covers may be different from fabric covers, especially on fitted items. Decorative leather seam (as double lapped felling or double seams) may be omitted depending on the model according to suitability of the fabric covering material.

The model is only worked with selvedge seam.

COVERING MATERIALS

You may find the information concerning the specific properties of the covering materials on the sample labels.

INDICATIONS OF DIMENSIONS AND REQUIREMENTS

All the values given are approximate values: dimensions in centimetres, material requirements in metres, leather requirements in

Already in the standard version dimensional differences with the height between add-on element and daybed up to approx. 1 cm can arise according to the construction.

The difference in dimension is in the tolerance range of the DGM rules.

ORDER CHECK LIST

Please pay attention to the following issues respectively to complete indications when ordering:

- **combination**
- **covering material**, with combination of covering materials
- **covering material per cover part**
- with leather covers and fabric-leather combinations
- **production with or without contrast stitching**
- with version with contrast stitching **colour of contrast thread**
- **leg version**, also **finish**
- **plateau version**, also **finish**
- **finish of table KA**, if desired
- **optional turn stopper**
